VENEER CORE MELAMINE PLYWOOD

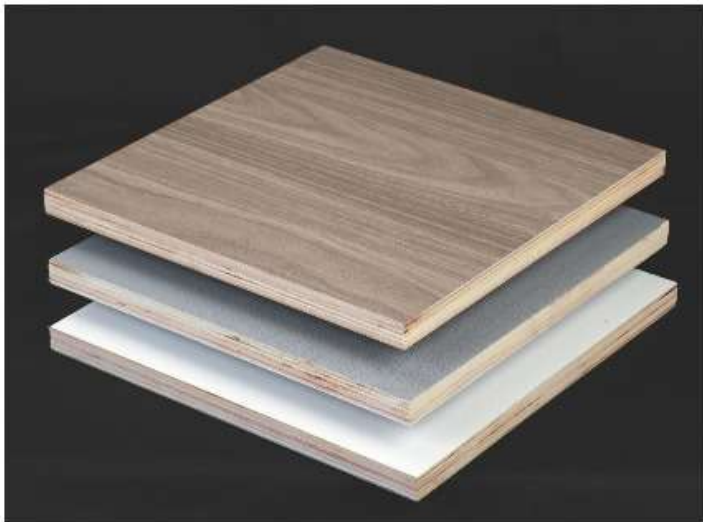

Thermally Fused Laminate (TFL)

Indian Melamine Plywood, or Thermally Fused Laminate (TFL), also known as Cabinet Liner, seamlessly combines the exceptional core quality of Athira Ply (Indian plywood) with a sleek laminate finish. Athira Ply's high-grade Indian veneer core is renowned for its tight construction, void-free consistency, and superior strength. It outperforms particleboard cores by supporting exposed edges and providing excellent nailing and screwing capabilities. With its ready-to-use, attractive finished surface, TFL is an ideal choice for interior design, cabinetry, cabinet box construction, shelving applications, and more.

Product Specification

Finish	: 1 Side, 2 Side
Core Veneer used	: Melia dubia + Eucalyptus
Color Design	: White, Black, Walnut, Silver, Teak, Fabric
